

# Fortune Cookie Brainstorming Session :D

- Suggestions on what to brainstorm:
- what type of fortune teller
  - what type of users will be using it (users + expectations)
  - features we want
  - any particular theme (app theme/mood/design)
  - what you think is part of a good fortune teller
  - additional thoughts
  - clarify definitions and requirements

- Upcoming tasks:
- project pitch (due wednesday)
  - creating an ADR

Suggestions on what to brainstorm:

- what type of fortune teller
- what type of users will be using it (users + expectations)

Imagine that you are one of these users (ex: a student, athlete, blue-collar worker, etc.) and what type of fortune teller you would interact with

Try to deviate from any fortune-cookie idea right now

Now look into the different types of fortune tellers and plan out your own fortune teller - this will be shared later in our group meeting today

Please do NOT think about fun fancy features (e.g. animations, sounds) for now

Types

- daily lucky number (user enters input)
- hexagrams that explain what each of them mean
- which fortune expert you might talk to
  - user inputs birthday
  - lottery tickets + wheel of fortune
- PERSONALIZEABLE
